ABOUT ME

DevOps Engineer with practical experience in Linux, Docker, Kubernetes, Azure, Terraform, CI/CD, GitHub Actions, Python automation, databases, and production-oriented deployment workflows.

- Completed an intensive DevOps Engineer Professional Certificate program at Mate academy with 462+ practical tasks.
- Worked on commercial and volunteer web projects: environment configuration, release preparation, deployment checks, and post-release validation.
- Background in project coordination helps me keep technical work organized, documented, and aligned with project goals.
- English: Upper-Intermediate (B2). Ukrainian: Native.

SKILLS

Linux	Docker	Kubernetes	Azure
Terraform	CI/CD	GitHub Actions	Python
MySQL	PostgreSQL	Liquibase	Bash
SIEM	IDS/IPS	AI Integration	API Integration

EXPERIENCE

DevOps Engineer - Vid Franko

Commercial production website support

- Supported production launch preparation for a commercial website with attention to availability, configuration, and release readiness.
- Worked with environment variables, build verification, deployment control, service availability checks, and post-release validation.
- Reviewed logs, configuration, and deployment flow to reduce manual risk during operational handoff.
